

**Tristan Mendoza**   [tristanm.tx@ieee.org](mailto:tristanm.tx@ieee.org)   (512) 706-5318  
<http://tristanmtx.github.io>   ---   <https://www.linkedin.com/in/tristanmendozatx>

*Lifetime IT professional with 20+ years of professional experience spanning the entire spectrum- Network Engineering (L2/L3 Routing, Firewall, IPSEC/SSL VPN, Scanning and Monitoring); Linux Administration and Scripting (Bash and Python), IAM/kerberos solutions; Configuration Management/IaC (Ansible, Puppet), and Information Security. Currently working with infrastructure, architecture deployment with the Kubernetes ecosystem, Terraform, AWS CloudWatch, and returning to programming with Python.*

----- **Certifications:**

- CCNA Routing and Switching
- Amazon AWS Solutions Architect Associate
- EC-Council Ethical Hacker (CEH), Forensic Investigator (CHFI)
- CCNA CyberOps (InfoSec)
- Metro Ethernet Forum SDN/NFV Professional
- CompTIA CASP, Security+, Network+

----- **Technical Areas:**

**Network Technologies:** TCP/IP, Routing (RIP, OSPF, EIGRP, BGP), VPN (IPsec and SSL, DMVPN)

- Cisco to Juniper MPLS via cross-connects/ pseudowire to form enterprise WLAN. F5 load balancers.
- Packet inspection/ analysis with Wireshark; testing with NMap, Scapy, hping, etc.

**Firewall:** IPTables, ACLs; pfSense; ASA/ASDM; Fortigate, etc.

**Virtual Infrastructure:** AWS, GCP; VMware ESXi/NSX, Openstack

**Infosec:** Monitoring traffic (Nagios, etc.); SIEM (Splunk, etc.); Vulnerability assessment (Qualys, Nessus, etc.)

**CI/CD, Infrastructure as Code:** Ansible, Terraform, (some Puppet/ Chef/ Jenkins)

**Cloud Native:** AWS, GCP; Kubernetes, OpenShift, Istio, Helm, Prometheus, GitOps, etc

**Operating Systems:** Linux (primarily), Mac OS X, BSD, Windows Server (Active Directory, Group Policy, etc)

**Programming Languages:** currently: Python, Bash, some PowerShell; legacy: C/C++, Java, PERL)

----- **Employment History**

Various End Clients (through Robert Half, K-Force, etc) - 02/2019 - present

*Consultant, Contractor*

- Continuation of previous contracting as mentioned below (in 2015-2019) with more of a Cloud and DevOps emphasis.
- Got AWS Solutions Architect Associate certification and (in 2022) am working to upgrade to Architect Professional.
- Was introduced to and networked with CEO of WeaveWorks and their staff; which turned attention to GitOps and their solutions for managing multi-cloud distributions of Kubernetes.

GenXComm Inc- 04/2020 - 08/2020

*Machine Learning/ Neural Networks project*

- Programming machine learning scenarios and deep neural networks
- Python, Tensorflow, NumPy/Pandas, and Keras

Charter - Spectrum Enterprise - 07/2018 - 02/2019

*Network Engineer II, Enterprise Managed Services Operations, Event/ Incident/ Problem Management team*

- Troubleshoot and configured layer 2 and layer 3 circuits [VRF, MPLS, VPLS; xconnects, LACP, etc.]
- Provided tier 3/4 on-call/after-hours solutions to issues escalated by technical support, field techs.

Supported services included:

- DIA (direct internet access) internet provisioning through our onsite router(s)
- ELAN (Extended LAN) - tunneling traffic from enterprise main site(s) to branch locations over MPLS/VPLS core to onsite router(s) at the customer premise(s); sometimes through other service providers
- Ethernet over DOCSIS (EoD) - fiber not available/justified- site to site MPLS/VPLS to DOCSIS, DOCSIS only
- Carrier EoD - designed for redistribution to enterprise customers under their own management downstream.
- RAD, ADVA fiber or DOCSIS devices passing traffic to Cisco 800, 1900, 2900, and 3900 series ISR's, ASR 1000's, ASA 5xxx's, Meraki, or Fortigate for customer handoff endpoint
- Juniper MX or Cisco 2921 concentrators for provider edge
- Cisco Prime, Ruckus SCG wireless controllers; IP video, QAM, channel insertion

Various End Clients (through Robert Half, K-Force, etc) - 01/2015 - 06/2018

*Consultant, Contractor*

- Racking, stacking, and wiring datacenter cabinet rows
- Installing, configuring, deploying Mac, Windows and Linux workstations
- Deploying and configuring LANs for offices and workshop events

- Performing security assessments; penetration tests, and vulnerability analysis of SMBs
- Consulted on assessment of WiFi provisioning for a major conference (est. 6000 people)
- Technical writing - produced concise yet thorough advanced overviews to replace over-worded "teach-to-the-test" literature. Topics covered include various Cisco, RHCE, and infosec topics.

#### Example 1: Experian Health - 10/2017 - 01/2018

##### *Network Security Engineer: Systems Operations, Vulnerability Management*

- Reported to the VP of IT Ops; coordinated with production control, change management, DevOps, etc.
- Removed vulnerabilities on Cisco/Dell/F5/etc., Linux/Windows server/VDI images in various data centers.
- Infrastructure scanned with Qualys/Tanium/etc; output to Jira, Helix ALM/TestTrack for ticketing.

#### Example 2: CompuCom - 06/2017 - 09/2017

##### *Network Field Consultant*

- Analysis and prompt resolution of network outages from customer premise border to endpoints
- Assessed fiber to cat5e/6 converters, ODUs; PDU, routers, switches, firewalls, NAS, etc.

#### Austin Community College - Psychology, Sociology - 08/2006 - 10/2014

##### *Departmental Executive Assistant*

- Consulting for Department Chair; had 25+hrs/wk surplus time on the job, encouraged to use for studying, reconsolidating knowledgebase, topics ranging from RHCE, Kali Linux, and Cisco.

#### Texas Radiation - 02/1999 - 05/ 2006

##### *Systems Administrator*

- Evaluated several versions and configurations of Linux for stability and suitability
- Conducted system optimization/ performance tuning on Linux systems

#### HumanCode [acquired by Sapient] - 05/1999 - 02/2001

##### *Programmer/ Engineer*

- Object-oriented programming in Lingo (Director) and ActionScript (Flash), some PHP/MySQL
- Java and C++, reached an intermediate-level in both.

#### University of Texas at Austin - 06/1994 - 05/1999

##### *Computer Programmer/ Network Services Asst*

- Co-supervised all labs provided by College of Education including:
  - Network infrastructure and planning.
  - Server optimization, group policy, user/group administration on Windows Servers
  - Computer lab management, faculty IT support throughout the college.

### **----- Educational Experience**

#### 05/1996 - 05/2000

##### University of Texas at Austin

- Courses spanning UI/UX, programming, systems and network engineering outside of a degree plan.

#### 05/1985 - 05/1989

##### LBJ Science Academy (secondary school)

- College level BIO I & II, CHEM, PHYS. Honors english, history, & mathematics (up to pre-calc)
