

# **Want to Prevent A Nuclear Waste Dump Over 320 TIMES Larger Than Sierra Blanca From Coming To Texas?**

*Believe it or not, that's exactly what is approaching rapidly, as our State Legislature may very soon let the company WCS make billions while turning Texas into a pay toilet for the nation's radioactive waste, dumping over 400 football fields of waste per decade from the US Department of Energy. When the site closes, WCS would even be able to leave with the profits and force our State to inherit the financial and environmental liability.*

*For 20 years, Texans have stood up and opposed nuclear waste, so far preventing six waste dumps from being placed on Texas soil. Right now, we need to again send a clear message to our State officials that Texas is still absolutely unwilling to be transformed into a dumping ground for the nation's nuclear garbage. The health, safety, and security of Texans must not be compromised to serve private interests. In addition, corporate welfare as proposed should not be handed over, especially at a time when our State faces a budget crisis.*

**Come Join Us In Protest!  
Texas State Capitol South Steps  
Wednesday April 23rd, 2003 at 1:30 pm**

**Cosponsored by Texas Radiation Online and Nuclear-Free Texas.**

It is also very important to contact State officials directly. The committees listed below need to hear from us and understand how important it is to Texans to stop this bill. Please call these numbers at the Capitol and urge them to vote NO on Senate bill 824 and its House counterpart, House bill 1567.

- House Calendars Committee- Chair, Rep Woolley- Office: (512) 463-0696
- Senate Natural Resources Committee- Office: (512) 463-0390

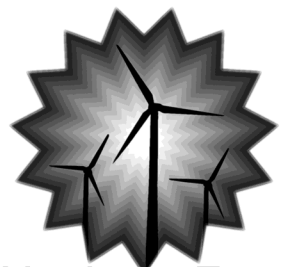

*For your district representatives, have your zip code ready for the clerks, and call (512) 463-0845 (for the House) and (512) 463-0100 (for the Senate)*
